

Why Wood?

Because it's born here...

...not here.

Wood is naturally grown and responsibly harvested, renewable and beautiful. Oil... is not.

Composite decking products contain plastic which is manufactured with oil and consume significant resources to refine and produce.

Wood is natural. It's grown simply with sunlight and water and absorbs carbon, thus reducing greenhouse gas emissions throughout its life in the earth and on your deck.

Choose wood: it's naturally made, naturally strong, naturally beautiful.
